

## B&NES Notification of works in Swainswick

### Highway drainage works starting 6<sup>th</sup> February 2017

As part of BaNES's highway capital programme, we have a scheme in for February to undertake drainage improvement works in Upper Swainswick, Innox Lane. The work is to install a new length of highway drain to pick up the excess water that is flowing onto Innox Lane and causing a nuisance for properties there. This will require a temporary road closure, **it is programmed for 4 weeks and is due to begin 6th February**. Although the work is under a road closure, access to properties will be maintained throughout and the majority of work will be undertaken during the February half term. I am sending a letter to residents this week. The pipe will be laid in sections to reduce the physical length of the closure, the indicative plan of the closure extent (attached) does not label this.
